

ASHFAK SEINUDEEN

Software Engineering Intern Candidate — Full-Stack Development

Kurunegala, Sri Lanka | +94 78 686 2100 | ashfakseindeen@gmail.com | linkedin.com/in/ashfak56 | github.com/DevWith-Ashfak | [Portfolio](#)

SUMMARY

IT undergraduate at SLIIT with hands-on full-stack software development experience across the MERN stack, Spring Boot, and React Native, complemented by applied machine learning projects using Python, Scikit-learn, TensorFlow, and Keras. Skilled in designing and consuming RESTful APIs, implementing JWT-based authentication and authorization, applying object-oriented programming principles, and integrating relational and NoSQL databases (MySQL, MongoDB). Experienced in building and evaluating supervised and unsupervised machine learning models, with strong data preprocessing, EDA, and visualization skills. Comfortable with Git-based version control, Agile team workflows, and deploying production applications. Seeking a Software Engineering Internship to contribute and grow as a developer in a production environment.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, TypeScript, Python
- **Web Development:** React, Next.js, Node.js, Express.js, Spring Boot, RESTful API Design, JWT Authentication
- **Mobile Development:** React Native
- **Databases:** MySQL, MSSQL, MongoDB, Spring Data JPA
- **Data Science & Machine Learning:** Scikit-learn, Pandas, NumPy, SciPy, Matplotlib, Seaborn, OpenCV-Python
- **Deep Learning:** TensorFlow, Keras
- **Concepts & Practices:** Object-Oriented Programming, MVC Architecture, Version Control (Git/GitHub), Agile Team Collaboration, CI/CD Deployment (Render)
- **Tools & IDEs:** IntelliJ IDEA, Visual Studio Code, Jupyter Notebook, Figma, Postman

PROJECTS

Resume Tailor — AI-Powered Resume & Cover Letter Assistant

Apr 2026 – May 2026

Next.js 14, TypeScript, Tailwind CSS, shadcn/ui, Express.js, pdf-parse | Individual Project | [GitHub](#)

- Built a full-stack web application that compares an uploaded resume against a job description to generate AI-driven gap analysis, keyword suggestions, and a tailored cover letter.
- Implemented server-side PDF parsing and file uploads (pdf-parse, multer) on an Express/TypeScript backend, paired with a Next.js App Router front end and Markdown-rendered AI output.

Ceylon Explorer — All-in-One Tourist Super App

Feb 2026 – Apr 2026

Spring Boot, Spring Data JPA, Spring Security (JWT), MySQL, JavaScript, Leaflet.js | Team Project | [Live Demo](#) | [GitHub](#)

- Owned the Itinerary and Culture & Calendar modules, designing REST APIs with Spring Boot and Spring Data JPA and building interactive front-end features with vanilla JavaScript and Leaflet.js maps.
- Implemented secure, stateless authentication and role-based authorization using Spring Security with JWT, and structured relational data in MySQL.

Lanka-Eats — Food Delivery Mobile App

Jan 2026 – Feb 2026

React Native, Node.js, Express.js, MongoDB, Figma | Team Project | [GitHub](#)

- Developed the end-to-end delivery module, including order placement, real-time order tracking, and delivery-status updates, using Express.js controllers, routes, and MongoDB models.
- Collaborated with a cross-functional team to translate Figma UI designs into functional React Native screens and backend logic; deployed the app on Render.

Customer Segmentation using K-Means Clustering

Aug 2025

Python, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn | Individual Project | [GitHub](#)

- Built an unsupervised machine learning model to segment customers into meaningful clusters using the K-Means algorithm, improving customer profiling for marketing analytics.
- Applied data cleaning, feature engineering, normalization, and visualization techniques to analyze customer behavior and generate actionable business insights.

Student Depression Prediction using Machine Learning

Aug 2025

Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn | Individual Project | [GitHub](#)

- Developed a supervised machine learning model to predict student depression using demographic, academic, lifestyle, and mental health factors, enabling early identification of at-risk students.
- Implemented data preprocessing, exploratory data analysis (EDA), feature engineering, model training, and performance evaluation to generate data-driven insights.

EDUCATION

Bachelor of Science (Honours) in Information Technology

2024 – Present

Sri Lanka Institute of Information Technology (SLIIT), Faculty of Information Technology — Year 3, Semester 1 (In Progress)

G.C.E. Advanced Level — Biological Science Stream

Kekunagolla National School — Physics: B, Chemistry: B, Biology: C | Z-Score: 1.0453

CERTIFICATIONS

- Google Professional Certificate — [View Credential](#)

SOFT SKILLS & LANGUAGES

Soft Skills: Problem Solving, Team Collaboration, Adaptability, Fast & Continuous Learning, Time Management

Languages: English (Fluent), Tamil (Native), Sinhala (Fluent)
